## The Fall Tattooing Aftercare

1. ALWAYS wash your hands before touching your tattoo.
2. Remove bandage carefully a few hours after being tattooed.
3. Wash the tattoo with water and a liquid soap\* a few times a day; rinse well. Pat the tattoo dry very carefully. (Do not rub)
4. After the second or third day of getting your tattoo, you can use a moisturizing lotion or an ointment/cream made for the aftercare of tattoos\*. Apply a THIN layer a few times a day
5. - Do not re-apply a bandage unless told to do so by your artist  
- Do not share your lotion with anyone  
- Do not pick the scabs
6. - Avoid submerging the tattoo under water  
- Avoid exposing it to direct or simulated sunlight  
- Avoid exposing your new tattoo to very dusty or dirty environments. This is one situation when you can re-bandage your tattoo (lightly/carefully, for a short time) to help protect it from being exposed to grease or dust.
7. Your tattoo should heal within two weeks and completely heal in four weeks.
